Kable Lite Surface Transformer-150W EI

DESCRIPTION

This single-feed surface transformer converts standard 120 line-voltage to 12 volts to provide the necessary voltage for powering a Kable Lite low-voltage lighting system. It can power lamps totaling up to 150 watts. The transformer is concealed inside a decorative housing with a fast acting secondary circuit breaker that will safely turn the system off should a short occur. Once the short has been removed the unit can be reset by simply flipping the wall switch off and back on.

INSTALLATION

This product can mount to either a 4" square electrical box with round plaster ring or an octagon electrical box (not included).

OTHER

The shortest rigid standoff that can be used with this surface transformer is the 5" rigid post standoff (sold separately). 12 volt transformers require the use of 12 volt lamps.
